Why GO Business?

We understand organisations want more performance, more results, more information in less time, using less resources than ever before. The demands of modern business now require software solutions which are different to the traditional systems of the past.

Designed by experienced business & accounting people with real world business in mind, the GO Enterprise Suite offers a fresh approach to business software.

Smarter Business Software

Think outside the box ...

Smarter

- Full integration gives you information at your finger-tips, not 4 or 5 clicks away.
- Practicality and usability, empowers users to do their work simply and easily.
- In built, form by form, help and product support functions.
- Your choice of form profile … choose from streamlined "WYSIWYG" quick forms, data rich GO X-Ray view or a combination of both.
- Scalability, delivering power to manage business, from 1 to 1000's of users.
- Advanced security, delivers maximum data protection and access control.
- Multi Everything- Company, Location, User, Currency, Language and available in a number of deployment options to suit your organisation.

Speed matters …
Accelerate your competitive advantage with GO

Quicker

- Quicker start-up and implementation saves you time.
- Easy to learn GO "one form" structure, means quicker system training.
- Access information with fewer clicks, fewer forms = less time wasted.
- Fast data processing and printing, because you shouldn't have to wait.
- Agile navigation with cross linked functions and data, system wide.
- No down-time. End of period statement, journals & roll overs processed "live" while the system remains fully operational.
- GO speeds-up performance across your organisation, because time is money.

A paradigm shift in enterprise software

Experience the difference!

Different

- Unique software design, architected from the front end, back.
- Built on state of the art Microsoft technology making it powerful, MS compatible and robust.
- Tailored solutions fit to purpose because "one size doesn't fit all".
- Innovative integration of documents, emails and messaging, so information is retained and centralised within the organisation.
- Leading edge activity logging and security facilities to safeguard your organisational data.
- Your choice of deployment, GO Cloud or the range of GO On-Premise options.
- Attractive product "bundling", and cost effective payment options with no hidden surprises.
- Experienced Sales, Service and Support teams, who speak your language and listen so that you get the solution you want.

Who is GO Business?

GO Business Australia Pty Ltd is a world class Enterprise Software Specialist, combining up-to-the-minute technology with proven, long standing market expertise.

We offer fully configurable, hyper-integrated business management and accounting products packed with a multitude of powerful and unique features built to maximize productivity, performance and profits.

Developed by an award winning Australian Design Team, with over 30 years of business experience, our Enterprise Resource Planning (ERP) software solution is built to satisfy the operational needs of a variety of businesses, from the very large to the very small.

As a multi-user, multi-company, multi-location, multi-lingual and multi-currency system, the GO Enterprise Suite offers a one stop solution specifically designed to handle the diverse needs of a growing and expanding business.

Fully Configurable to suit

At GO Business we recognise that our software is there to support your organisation and it's people. Therefore our team is comprised of both technical and business professionals who understand the demands of selecting and implementing new systems and procedures in an organisation. Our deployment, support and training teams are there to ensure a smooth transition to any of the GO Business software solutions.

GO Business Software:

The GO Enterprise Suite addresses the needs of:

- ✓ Quoting and Sales
- ✓ Inventory Management
- ✓ Procurement and Purchasing
- ✓ Project and Job Costing
- ✓ Customer and Supplier Management
- ✓ Security & Administration
- ✓ Email & Document Integration

Plus the financial accounting requirements of:

- ✓ Debtors Accounts Receivable
- ✓ Creditors Accounts Payable
- ✓ General Ledger
- ✓ Financial Reporting

So, if your business requires...

- ✓ agile customer management tools
- ✓ easy-to-use, sales driven systems
- ✓ powerful, integrated item classification and inventory control
- ✓ comprehensive project and job costing tracking and management facilities
- ✓ flexible, up-to-the-minute user defined reporting, including statistical and graphic display
- ✓ and a one-stop business management and financial accounting solution

... the Go Enterprise Suite can provide you with the systems to power your business and the tools to empower your team.

Full integration across your organisation. Enter data once and it's everywhere you need it to be.

GO Business Customers:

GO Business customers range from small to medium enterprises to global corporations as well government departments.

Clients have used GO Products off the shelf or customised to suit their industry needs. In fact, many of our customers have used GO Business through the various stages of their growth and have told us, they choose to stay with GO Business because of its ease of use, reliability and practical approach to doing business.

Some of the industries GO Business serves includes:

- ✓ Inventory & Distribution

Systems to Power Your Business

... Tools to Empower Your Team

Our software is truly customer driven. Here's some examples of solutions that solved specific customer issues. These are now part of the GO Enterprise suite available to all users:

- The ability to easily handle product offcuts and remnants
- Order in one unit of measure sell in another ... eg order in tonnes and sell in metres
- Able to handle items / products that turn out to have different quality or become damaged
- More accurate margin calculations with oncosting allocated by weight or unit cost
- New solutions being added all the time ... what's yours?

Smarter ● Quicker ● Different ….. that's what our customers say about GO:
