The GO Data Centre Difference

INTEGRATION

First and foremost, for customers, the *most important difference* between the GO Data Centre offering and all other public offerings can be summed up in one word... **INTEGRATION**. Unlike other hosting services, GO Data centre integrates **your private network** with our data centres, to extend your environment to the cloud, and therefore to anywhere in the world that you decide to conduct your company's business.

Creating your own 'Hybrid Cloud' effectively links your office network to your facilities in the GO Data Centre Cloud, and provides you with the following additional benefits.

PREMIUM SERVICES AND SUPPORT

All GO Data Centre customers receive premium support for both on-site and hosted environments, multiple data centre locations, live replication, offsite backups and multi-hypervisor support. And best of all, we come to know and understand your business and its needs and priorities.

STATE-OF-ART SOFTWARE

All GO Data Centre customers are provided only the very best of breed and only **latest** versions of all hosted products, including:

- Virtual Office shared hosting
 - MS Exchange
 - MS Office Suite
 - MS SharePoint
 - MS CRM
 - Lync
- Dedicated Virtual Private Server and desktop hosting on Hyper-V and ESXi
 - Windows Server 2012, 2008 R2, 2008, 2003, SBS 2008/2011
 - Windows 8, 7, Vista, XP
 - CentOS
 - Linux
 - Novell
 - FreeBSD
 - Sun Solaris
- Virtual Data Centres
 - Dedicated Hyper-V and VMware clouds for IT support staff to have full control over their own hosted environment

STATE-OF-ART EQUIPMENT and DEPLOYMENT

All of the equipment owned and used by GO Data Centre is recognised, brand named, high performance and high quality equipment such as:

- IBM, Cisco, Fortigate and Microsoft Hyper-V and VMware virtualisation
- High speed internet access out of the data centres
- Live replication to Disaster Recovery site in separate geographical locations
- Worldwide Remote desktop portal access, 24/7/365

SIMPLE PRICING MODEL

GO Data Centre pricing models are simple and very easy to understand, and apply. (Prices starting from as little as \$2 per user per day'.) See page 11 for further details.

 - ✓ **ACROSS MULTIPLE DATA CENTRES**
 - ✓ **STATE-OF ART SOFTWARE**
 - ✓ **PREMIUM SERVICES**

Talk to 1 company to satisfy all your IT infrastructure needs.

“Redundancy” You Can Rely On

To maximise the integrity, reliability, availability and security of client information, one of our primary features is our level of “redundancy”. Used in this context, redundancy is a very positive term where the more of it there is, the better.

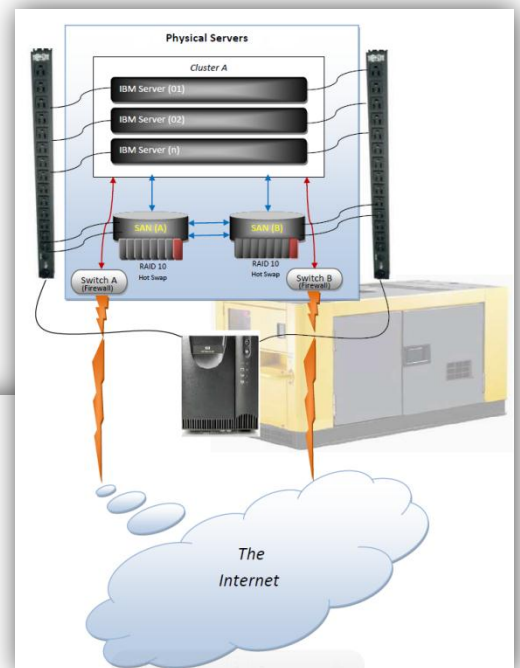

Every facet of the GO Data Centre infrastructure is duplicated, triplicated or more. You can rest assured that GO Data Centre makes every effort to provide your business the utmost in reliability and availability, with an already achieved service level of 99.98%+.

We acquire and use only the very best of components from IBM, Intel, Cisco, HP and Microsoft, and other reputable suppliers.

You can trust us to secure, operate and deliver your electronic assets such as your operating software, documents, email and other communications to wherever you need, 24/7 365 days a year.

All information stored in the GO Data Centre is replicated across two or more physical data centres, in real time.

We invest the dollar\$ required to achieve economies of scale across Data Centres so you save significant time and money for your business.

FAQs

- Q.** *“Can I trust the GO Cloud to look after my company’s interests?”*
- A.** Yes. The ‘GO Cloud’ was established first and foremost with our clients’ needs as our top priority. Looking after your company’s interests is our highest interest, in fact, we see your success as our success.
- Q.** *“GO Data Centre claims to be ‘different’. How is it different?”*
- A.** Firstly, GO Data Centre provides only Premium Services where every customer is treated with the highest priority. Every database is clustered and mirrored across multiple physical data centres. Every customer is offered only the very latest technology and the very highest possible service levels and hardware performance. GO Data Centre customers are rewarded for outgrowing initial requirements by paying less than the standard fees thus achieving greater economies of scale.
- Q.** *“What technology does GO Data Centre use?”*
- A.** The GO Data Centre is built using only the very latest, state-of-art Microsoft and VM-Ware technology, including Server 2008R2 and SQL Server 2008/R2, where all physical and virtual servers are clustered and synchronized real-time across 2 or more data centres.
- Q.** *“What are the practical limits to the number of users, transactions etc.?”*
- A.** Using the latest 64 bit Technology, there is **“no practical”** limit to either the numbers of users that can be accommodated, the numbers of transactions required to be processed nor the size of the database.
- Q.** *“Can my company’s website also be hosted with GO Data Centre?”*
- A.** Yes, GO Data Centre can host our company’s website, email, Sharepoint and any other software or services you require.
- Q.** *“But it all seems so complicated?”*
- A.** That’s why we recommend “keeping it simple” and that you leave all your complex infrastructure requirements to the GO Date Centre. In fact, you can consider us your very own infrastructure experts ... now that’s easy.
- Q.** *“How can I find out more?”*
- A.** To find out more visit our website at www.godatacentre.com , or call +61 8 9328 1008 to talk to one of our sales representatives.

Hosting Service Fees

GO Data Centre makes the pricing of our services easy.

- a.) Virtual Office hosting is priced on a per user basis, and starts at only \$2.00 per user/day for basic MS Exchange and document hosting. For only an extra \$1.00 per user/day you can add Remote Desktop Portal access.
- b.) Virtual private servers are priced based on the resources they need (CPU, RAM etc.) and the amount of (hard disk) storage required, and the amount of internet bandwidth and volumes used.

Additional computing requirements incur only nominal additional fees.

* All prices exclude GST and all other taxes and are valid at the time of printing but may be subject to change.

Service	Subscription Fee * (Per User, Per Day, from ...)
Virtual Office hosting with basic MS Exchange and document hosting (Eliminates need for on-premise IT server infrastructure.)	\$2.00
Add Remote desktop portal access for just... (Provides secure access to all your hosted applications 24/7 worldwide.)	\$1.00

Item	Virtual Machines	*Rental Fee (Per Month, from ...)
VSRV1	1 vCPU, 1GB RAM, 20GB storage, 2GB traffic	\$99.00
VSRV2	2 vCPU, 2GB RAM, 40GB storage, 5GB traffic	\$149.00
VSRV3	2 vCPU, 4GB RAM, 60GB storage, 10GB traffic	\$199.00

Setup and implementation services is available at \$160 per hour, charged in 15 min increments

The GO Data Centre Difference

We understand that organizations want more performance, more results, and more value for money in less time, using fewer resources than ever before. The demands of modern business now require business solutions which are different to those of the past.

Designed by experienced business and technical people GO Data Centre offers a fresh approach to data centre products, services and methods of IT infrastructure management and deployment.

SPEED MATTERS

Fast

- Fast performance that you can rely on.
- Scalability, delivering power to operate business, from 5 to 5000+ users.
- Hyper speed communications.
- Quicker start-up and implementation saves you time.
- GO speeds-up performance across your organization, because time is money.
- Using industry standard software there is nothing new to learn.

Reliable

- Unique infrastructure design.
- Built on state of the art recognised brand-name technology powerful, compatible and robust. (Microsoft, IBM, Cisco, HP etc.)
- All power sources are backed up by 3 or more power supplies.
- Custom solutions fit to purpose because “one size doesn’t fit all”.
- Innovative integration of client local area networks with their hosted solution in the GO Data Centre Cloud, providing secure access to documents, emails and messaging, allowing information to be shared across the entire organization.
- Attractive pricing with cost effective payment options and no hidden surprises.
- Experienced Sales, Service and Support teams, who speak your language and listen so that you get the solution you want.
- Access information worldwide 24/7/365.

WORLD CLASS SECURITY

Secure

- Leading edge security facilities to safeguard your organizational data.
- Advanced security, delivers maximum data protection and access control.
- Agile navigation with direct linked functions and data, system wide.
- All software and data is backed up both locally and remotely.
- No down-time. Maintained “live” while the system remains fully operational.
- Redundancy is paramount. Every physical and virtual device is either clustered and/or mirrored, both within and across 2 or more data centres.
